## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-4, and 7-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Clayton et al. (US2003/0039024).

With respect to claims 1, 3, and 7-11, Clayton show in Fig.2-3 a first optical cavity 34 comprising a bottom mirror 40 located outside of the optical fiber 18, a pumping laser 12 (p.2, para.0022), a top mirror comprising a reflector 46 located within the optical fiber 18, and an active region 38 between the top and bottom mirrors (40, 46).

With respect to claim 4, Clayton disclose a DBR (p.2, para.0035).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2828

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Clayton et al. (US2003/0039024) in view of Lading et al. (US6493090). Clayton disclose all limitations of the claim except for the polarization filter. Lading teach a polarization filter (col.12, l.26-27). For the benefit of a light source, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Clayton a polarization filter as taught by Lading.

Claims 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clayton et al. (US2003/0039024) in view of Boucart et al. (US6535541). Clayton disclose all limitations of the claim except for the mechanism for altering the wavelength. Boucart teach the mechanism for altering the wavelength (col.10, l.16-18). For the benefit of altering the wavelength, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Clayton the mechanism as taught by Boucart.
